Private Urology Clinic

RFL Private Urology Clinic is a team of four consultant urologists based at the Royal Free London NHS Foundation Trust.

As leading consultants, they are all recognised experts in their various fields. They all practice together on the NHS as a team.

Each consultant specialises in a different area of urology, allowing our clinic to offer comprehensive treatment for a wide variety of problems – from kidney stones to prostate cancer.

The consultants' individual expertise gives them in depth insight into their particular specialism, and yet they can combine their knowledge when necessary to treat more complex conditions.

The clinic provides expert and experienced urological diagnosis and treatment personalised on the individual man or woman with full support of the best equipment and clinical expertise of the Royal Free London.

Inpatient admissions and theatre facilities are also available at the Royal Free London Private Patients Unit.

AVAILABLE SERVICES

- Prostate assessment clinics including PCA-3 assessment
 - Haematuria (blood in urine) assessment

Consultant Urological Surgeon

Special interests: general urology and female & reconstructive urology (urinary incontinence, neuro-urology, bladder dysfunction, utis, bladder pain, chronic pelvic pain etc.)

WHAT TO EXPECT WHEN YOU COME TO THE CLINIC

Before you come:

The referrals team will ask you simple questions to enable registration with the clinic and to provide some background for the consultant.

You will be able to choose when you come in and who you wish to see. The referrals team will guide you through the options.

The booking will be passed on to the consultant who may ask you to come to the hospital in advance of the consultation for some tests. The referrals team will organise and schedule this with you. Please attend the clinic with a full bladder if possible as a urine flow test might be required.

You will be asked to provide information in relation to funding of your treatment, whether through insurance authorisation details or request for payment before any tests are carried out. The referrals team will be able to provide a rough estimate of the costs before you commit.

On arrival:

Please make your way to the Lyndhurst Private Outpatient Consulting Rooms on the 1st floor of the hospital to complete your registration. Please ensure that you arrive 15 minutes before your scheduled appointment.

You will be escorted round to the Urology clinic (2 minutes walk) to see the consultant and have any required tests performed. Companions will need to remain in the Lyndhurst waiting area where teas and coffees and other light refreshments will be available.

ON COMPLETION OF YOUR APPOINTMENT

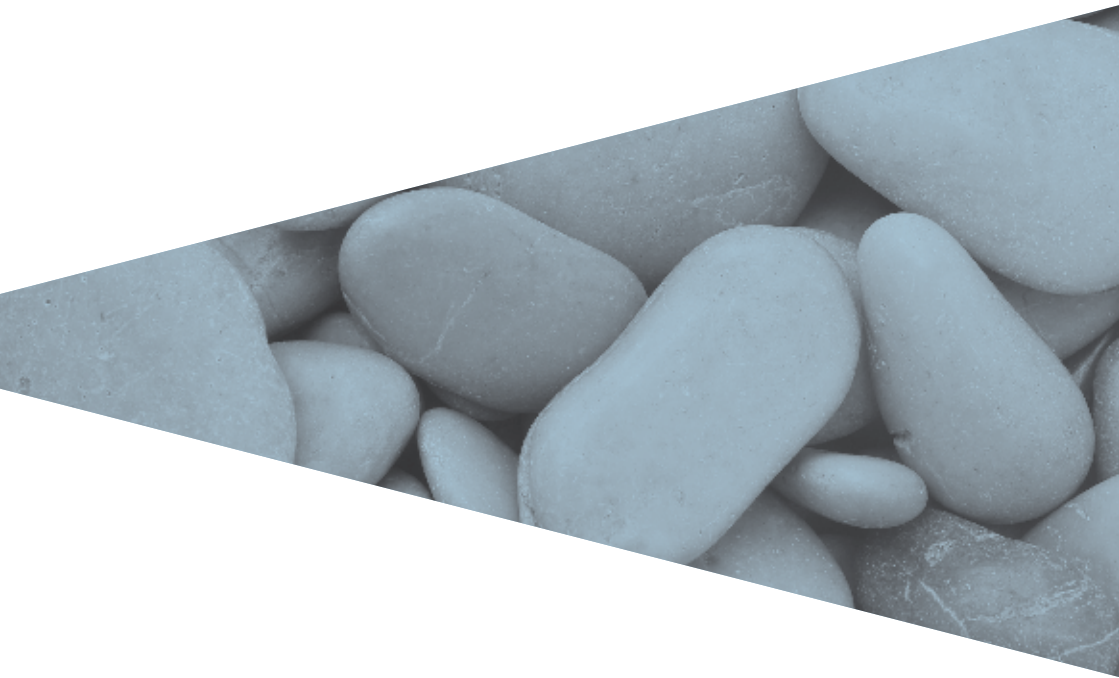

You may be required to return to the Lyndhurst rooms if there are any funding arrangements to complete and to pick up your companions.

The Private Patients team will liaise with you later for any further follow up appointments required. You will receive your medical report directly from your consultant.

PAYMENT

We are recognised by all major UK health insurers. Please ensure that you have spoken to your insurer and obtained authorisation for your treatment prior to your consultation or treatment. Please bring your authorisation reference with you.

If you do not have insurance, or you cannot obtain cover for this treatment, you will be asked for payment for your consultation or treatment before you visit. Call us to get guidance on how much your treatment may cost.
